- Collaborated with teams to improve moderation processes with UX-driven enhancements

EDUCATION

High School Diploma

Communal Institution Lugansk

01/2007 - 12/2018 Ukraine

SUMMARY

I'm a self-taught developer who found my passion for coding at the age of 12 after moving to a new city. Bored and in need of a creative outlet, I began making my own games, which sparked my love for development. This passion drove me to create my high school's first website. I've developed my skills through platforms like YouTube, Udemy, Skillshare and Three.js Journey. Now, I seek to apply my skills to drive company or project growth and development while continuously learning and evolving in a forward-thinking and open-minded environment.
